

SENTURO

Senturo is the most advanced and innovative foodservice ever developed to meet all your nourishment and sustenance needs

WHO ARE WE?

Brand Profile

Senturo is the latest digestive system we have developed that can be carried on a personal mobile device (such as a smartphone or smartwatch) to provide sensible dietary advice and food recommendations for each of us. When you need food, it will automatically navigate to a restaurant that meets your needs or provide healthy recipes.

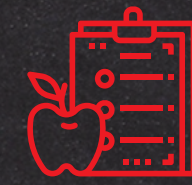

COMPANY KEY VALUES

- As Senturo is entirely customised to you, it is of critical importance that we meet each and every user's individual needs and create the leading and foremost foodservice product service, our paramount value is YOU.
- We recognise food can be complex where nutrients decisions for each individual includes a multi-layered process of individual factors, thus at senturo our value aims to meet your following needs:

ECONOMIC

DIETARY

ENVIRONMENTAL

PHYSICAL

CULTURAL

MORAL

VISION & MISSION

01. Vision

At Senturo, our vision is "to make every day simpler and create a brand that makes a difference in people's lives."

02. Mission

"To build the world's most enjoyable food service, where customers are delivered the finest and most individually personalised dietary choices effortlessly"

OUR PRODUCTS AND SERVICES

Senturo App

The Senturo app connects you with your favourite local restaurants and food services effortlessly. Our app allows you to order individual ingredients so that you can create your dearest recipes at home, or simply order from outstanding full menus from your best-loved local stores, wherever you want.

OUR PRODUCTS AND SERVICES

Senturo Smart Band

Senturo continues to go even further, pushing online food services to a level you have never seen before. We have developed both a smartwatch compatible application and our very own Senturo Smart Band that uses the latest and most advanced technology to understand you. Using both our Senturo Smart Band and your personalised profile, Senturo knows what you need, when you need it, ahead of time, to make your nutrition and dietary decisions simpler.

APPLICATION AND PROFILE SETUP

GENERAL INFORMATION

- Name
- Number
- Email
- Location
- Dietary preferences/requirements (e.g., celiac, vegan, gluten free)

PERSONALISED INFORMATION

- Body Measurements
- Economic Information
- Diet and digestion-related medical information.

SENTURO SMART BAND

- Additional information accompanying the Senturo app is required.
- The Senturo Smart Band also gathers non-stop information

- Using complex completely individualised data analysis of a customer's lifestyle, we develop a pre-prepared ordering process of what you need and when you will need it
- Senturo uses its advanced bodily sensing and internal monitoring systems with advanced medical technology to recognise what works for you and what doesn't.
- If your body is not responding to a specific food as it should be, we will notify and inform the user and modify our ordering process for that specific customer.

PRIVACY, TRANSPARENCY & SAFETY

**WE CARE ABOUT
YOUR SAFETY AND
WELLBEING**

PRIVACY

All data collected is stored in a secure centralised database, where we have a global team working around the clock to ensure all of your information is secure.

TRANSPARENCY

- We are committed to being 100% transparent.
- All information gathered can be accessed.
- Selective monitorisation system.

SAFETY

- We also recognise food and nutrition can be a sensitive topic to many individuals, if we believe a customer's health, safety and wellbeing is at risk, we inform the user and recommend help services.
- If the situation is dangerous or life-threatening, the user will not be able to access many features of a product upon evaluation.

FOOD RECOMMENDER SYSTEM

- Document your international travel
- Ensure safety while recommending food from surrounding areas or countries
- Intelligent AI will combine local food reviews to filter restaurants
- Ensure the user's dining experience when travelling abroad

TARGET DEMOGRAPHIC

This product is suitable for those who do not have time to eat on time at work or students who cannot take good care of themselves because of their busy academic schedules. Those who have high standards for food or need this product to adjust their physical life health can also choose Senturo.

FRIEND COMPETITION FUNCTION

- Friendship System
- Reasonable competition
- Increase product interest

PUBLIC WELFARE AND CHARITY SYSTEM

- Putting Health in Data
- Visualizing Health
